“I quickly found that I was gaining haemorrhoid relief for some time after each application!”

PRESTO GEL
Lasting relief the way Nature intended

Presto Gel brings rapid, lasting relief to inflamed, swollen & painful Haemorrhoids

Presto Gel is when used as directed a non prescription alternative to antiseptic, antibiotic and hydrocortisone drugs to sooth discomfort and support the body biologicaly function of healing.

Presto Gel contains a composition of highly active natural ingredients that has helped thousands of haemorrhoid sufferers around the world.

Presto Gel should be tried even when everything else has failed. You don't have to suffer!

Presto Gel provides an osmotic barrier dressing that supports the natural biological wound healing mechanisms that enable normal tissue repair, while soothing anal burning, itching, irritation, bleeding, swelling and sensitivity.

Research

The quest for a safe, natural preparation to help the body resolve haemorrhoidal issues at the Israpharm Clinic in Israel was done in 2006 by two highly respected physicians.

The research confirmed that most haemorrhoidal discomfort and inflammation is caused by bacteria and faecal acids and toxins, so work was begun to develop a gel to act as a protecting barrier based upon extracts from the aloe plant.

After 15 months of clinical trials involving patients presenting all stages of the condition, a formulation was achieved that greatly exceeded expectations, offering a strong lasting analgesic effect (up to 5 hours), despite the formula containing no analgesics!

Feel the difference!

Individual response may vary but from the first application, Presto Gel users will likely experience a brief, pleasant cooling sensation as the bacterial barrier takes effect. Continuing to use Presto Gel will bring increasing and longer lasting relief as healing progresses.

Presto Gel is registered I Europe as a medical device, Class I, according to Directive 93/42/EEC.

Who may use Presto Gel?

Presto Gel is for use by men and women of all ages, including pregnant or musing women and children over 12 years of age.

Side Effects

No side effects are known or expected.

Always consult your GP first.

Presto Gel may be used in conjunction with any other medicine and repeated as long as necessary. Allergy to Aloe Vera is rare, but when used as directed this may be tested and apart from possible first-time stinging no further discomfort should be noticed.

Active Ingredients

Containing natural ingredients selected to provide conditions that are favourable to self healing.

- Aloe Barbadenis Extract (Aloe Vera). This remarkable plant extract blocks bacteria and faecal toxins/acids, preventing the associated inflammation.
- Geranium Thunbergii and Pogostemon Cablin Leaf extracts. These natural preservatives avoid the use of synthetic, chemical preservatives.

Presto Gel contains no fragrance, animal ingredients, drugs, or harsh chemicals, synthetic preservatives or alcohol.
